### DATA SHEET

**Reagent:** Anti-HTLV-1 Tax Hybridoma (168B17-46-92)

**Catalog Number:** 1315

**Lot Number:** 10/7/91

**Release Category:** A

**Provided:** 8 x 10<sup>6</sup> cells/vial

**Isotype:** Undetermined

**Propagation Medium:** RPMI 1640 supplemented with 50 µM β-mercaptoethanol, 2 mM L-glutamine, 100 U/ml penicillin, 100 µg/ml streptomycin, 90%; fetal bovine serum, 10%.

**Freeze Medium:** Propagation medium, 90%; DMSO, 10%.

**Growth Characteristics:** Cells grow in suspension.

**Description** Balb/c mouse splenocyte x P3X63 Ag8.453 myeloma

**Special Characteristics:** Cloned from fusion parent 168B17 or 168A51. Hybridomas secrete monoclonal antibodies that recognize both native and recombinant HTLV-I Tax. A recombinant *E. coli*-derived Tax protein was used as immunogen. Antibody produced by the hybridoma reacts with Tax in Western blots and immunoprecipitation assays.

**Sterility:** Negative for mycoplasma, bacteria and fungi.

**Recommended Storage:** Liquid nitrogen
