### DATA SHEET

**Reagent:** HIV-1<sub>BRU</sub> Tat Monoclonal (7D5.1)

**Catalog Number:** 4673

**Lot Number:** 5 098139

**Release Category:** C

**Provided:** 1 ml culture supernatant, 0.904 mg/ml IgG.

**Host Site:** Mouse x NSO

**Titer:** ELISA 1:10

**Special Characteristics:** Raised against a recombinant Tat protein. Recognizes Tat in WB and ELISA.

**Recommended Storage:** Keep at 4°C for short term storage and -80°C for long term storage. Avoid freeze-thaw cycles as reagent degradation may result.

**Contributor:** Dr. Jonathan Karn, courtesy of the NIBSC Centralised Facility for AIDS Reagents.

**NOTE:** Acknowledgment for publications should read "The following reagent was obtained through the NIH AIDS Reagent Program, Division of AIDS, NIAID, NIH: HIV-1 Tat Monoclonal (7D5.1) from Dr. Jonathan Karn."

**Last Updated** September 16, 2015
